

RIYAN FADILLAH

| QA ENGINEER | RPA DEVELOPER

PROFILE

Highly experienced QA Engineer and RPA Developer with strong expertise in managing full-cycle software testing and Robotic Process Automation. Adept at delivering comprehensive testing coverage across API, Web, Mobile (Android & iOS), and Backend systems using tools such as Katalon Studio, UiPath, Playwright, Postman, and SQL. Specialized in developing and managing scalable RPA solutions with UiPath Studio Web, Orchestrator, Assistant, Mobile, and Agent, incorporating AI-driven intelligent automation. Proven ability to collaborate with developers, business users, and stakeholders to ensure quality delivery from SIT to UAT while driving automation initiatives and process optimization. Passionate about utilizing AI technologies to maximize efficiency and innovation in QA and RPA domains.

EDUCATION

(2012–2016)

**Indraprasta PGRI
University**

Information Technology

Final Projects:

- Android Application on Indonesian Culture – Developed a mobile app to promote and educate users about the rich cultural heritage across various regions in Indonesia.
- Web-Based Inventory Management System for a Building Supply Store – Created a web application to manage stock, track sales, and monitor inventory levels for small retail businesses.

EXPERIENCES

RPA Developer (January 2024 – Present)

PT Lintasarta Infotech – Placement : PT. Indosat

- Developed and maintained end-to-end UiPath RPA solutions using UiPath Studio Web, UiPath Orchestrator, UiPath Assistant, UiPath Mobile, and UiPath Agent to automate complex business processes.
- Designed, built, and deployed scalable RPA bots with robust architecture, including reusable components, exception handling, logging, and retry mechanisms.
- Managed the full lifecycle of automation projects using UiPath Orchestrator for bot deployment, scheduling, monitoring, queue management, and performance optimization.
- Utilized UiPath Agent and intelligent automation capabilities to build agentic workflows that combine RPA with AI-driven decision making.
- Developed mobile automation solutions using UiPath Mobile activities to automate processes on Android and iOS devices.
- Created and maintained attended automation bots using UiPath Assistant to support business users in their daily operations.
- Conducted process assessment and analysis to identify automation opportunities, estimate ROI, and design optimal automation solutions.
- Implemented best practices in RPA development including modular design, version control, code review, and documentation to ensure long-term maintainability.
- Collaborated with business stakeholders and IT teams to gather requirements, validate solutions, and ensure delivered automations aligned with business objectives.
- Troubleshoot and optimized RPA bots to improve reliability, reduce failure rates, and enhance overall performance.

IT QA Engineer (January 2023 – Present)

PT Lintasarta Infotech – Placement : PT. Indosat

- Developed and executed UiPath automation scripts for efficient and accurate testing.
- Designed and implemented automation testing solutions based on thorough system requirement analysis.

LANGUAGE

English – Professional

SKILLS

ROBOTIC PROCESS AUTOMATION (RPA)

- UiPath Studio Web, Orchestrator, Assistant, Mobile, Agent — **Advanced**

TEST AUTOMATION

- Katalon Studio — **Advanced**
- Playwright — **Advanced**
- Karate Framework — **Advanced**
- QA Pilot — **Intermediate**
- Selenium (Java) — **Intermediate**

API & BACKEND TESTING

- Postman (API Testing) — **Advanced**
- SQL (PostgreSQL & Oracle) — **Advanced**
- Backend Testing — **Advanced**

GIT VERSION CONTROL

- GitLab & Version Control — **Intermediate**

PERFORMANCE TESTING

- K6 (Load & Performance Testing) — **Intermediate**

AI & INTELLIGENT AUTOMATION

- Intelligent Automation (RPA + AI) using UiPath Agent — **Advanced**
- Generative AI for Testing (ChatGPT, Prompt Engineering) — **Advanced**

TEST MANAGEMENT

- JIRA (Defect & Test Management) — **Advanced**
- UiPath Test Manager — **Advanced**
- Silk Central — **Advanced**
- Test Rail — **Advanced**
- Confluence — **Advanced**

METODOLOGY

- Agile / Scrum — **Advanced**

EXPERIENCES

- Performed comprehensive manual and system integration testing (SIT).
- Conducted API testing using Postman, validating endpoints, responses, and status codes.
- Validated test data and results via SQL queries (Oracle, PostgreSQL).
- Collaborated with business users to ensure system functionality met expectations.
- Created and maintained detailed test plans, cases, and results documentation.
- Performed regression testing to maintain application functionality post-updates.
- Managed defects using JIRA, coordinating with developers for resolution.
- Prepared and presented testing reports for project tracking and decision-making.
- Utilized Git for version control and team collaboration.

QA Engineer (January 2022 – January 2023)

PT Intikom Berlian Mustika – Placement: PT. Otto Digital

- Developed and executed automated tests (Katalon Studio) for Bank INA's core banking system (Android), including key functionalities (balance inquiry, fund transfers, bill payments, account profile).
- Performed comprehensive manual and automated testing across Android and iOS platforms, ensuring cross-platform compatibility.
- Conducted SIT and UAT, leveraging automation scripts for efficiency and comprehensive test coverage.
- Managed the entire defect lifecycle using JIRA, driving timely resolution through detailed reporting and retesting.
- Performed daily regression testing using automation scripts, providing regular reports to QA Lead.
- Collaborated with end-users to gather requirements for automated test script development.

IT QA Engineer (July 2021 – Dec 2021)

PT Avows Technology – Placement: PT. BTPNS

- Developed and managed comprehensive manual test cases (Silk Central) for employee application features (agenda, financial workflow).
- Executed System Integration Testing (SIT) collaborating with developers.
- Managed defects (JIRA), providing detailed developer remediation guidance.
- Prepared and delivered concise test result reports.
- Participated in weekly automation script learning sessions with the automation team using Silk Test to enhance automation skills and knowledge sharing.

IT Test Engineer (May 2019 – Jun 2021)

PT Axia Mandiri

- Partnered with cross-functional teams (Marketing, Finance, Business) to define automation test strategies.
- Collaborated with manual QA to ensure seamless test case alignment for automation.
- Developed robust Katalon Studio automation scripts covering critical flows (product marketing, registration, insurance calculations).
- Executed System Integration Testing (SIT) leveraging existing automation frameworks.
- Provided UAT support, assisting end-users and documenting findings.
- Managed UAT defect tracking and collaborated with QA for resolution.
- Conducted regression and stress testing, ensuring Play Store release readiness.

Administrator IT (April 2019 – April 2021)

PT Bank Mandiri, Tbk.

- Processed and verified VISA/MasterCard transactions, ensuring accurate posting to the core system.
- Managed and verified ATM transactions, posting data accurately to the core system.
